

## Cable Fault Locator/ HVC Coupler Accessories

### FEATURES

- 125 Feet of High Voltage Cable
- 125 Feet of Ground Cable
- Free Standing Rack with 2 Reels

### DESCRIPTION

The Model 8100 High Voltage Cable Rack provides a user with 125 feet of High voltage cable and 125 feet of Ground Cable. Used in conjunction with most cable fault locators (Thumpers) and HVC Couplers, the 8100 provides a convenient and flexible device to safely and quickly make connections to cables under test. The High Voltage cable is terminated with an MC connector to allow for either a locking plier connection or another accessory such as those listed on the back of this sheet. The ground cable is terminated with a standard grounding clamp which can be used with a shotgun stick. A pigtail is available to retrofit most thumpers to this cable rack system or our HVC series of couplers. Please consult your representative for further details.

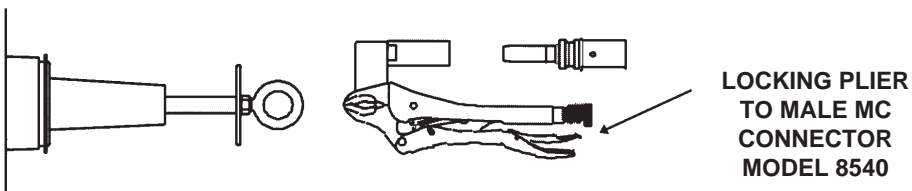

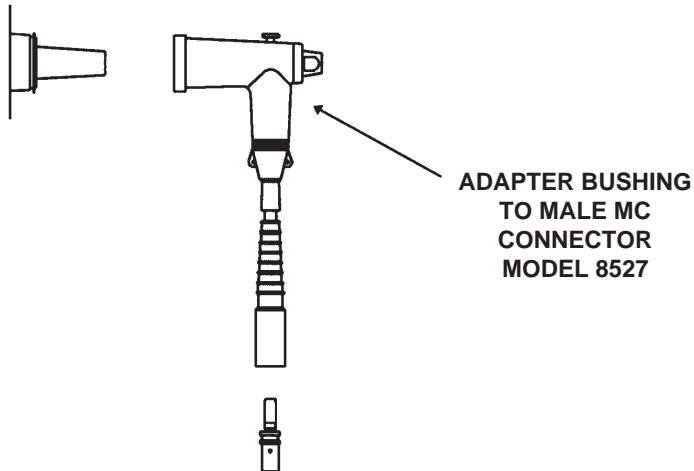

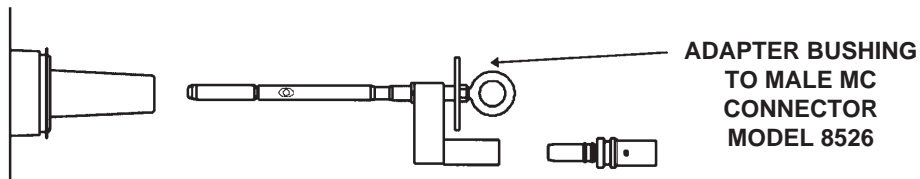

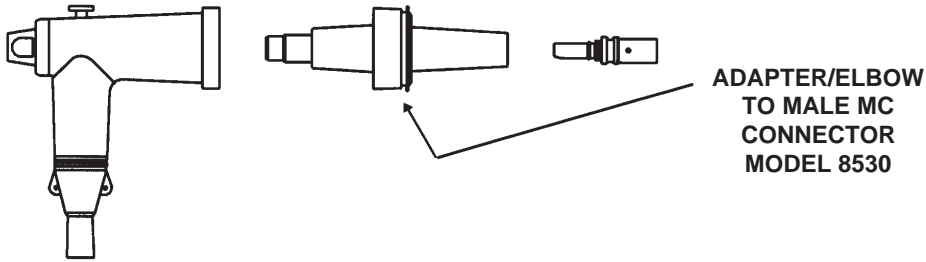

*HV Cable Rack Model 8100*
