General Description

The 3730 is a compactly designed 12 kV SF6 reference capacitor with seven calibrated, manually selectable values of tan delta (power factors)

Tan d (power factor) value selection is done by a rotary switch.

A fast functional check of capacitance and tan delta bridges like MIDAS 2881 or MIDAS micro 2883 among others is possible.

Features	Advantages
▪ LEMO and BNC connections available	☑ Flexible connection to the measuring bridge
▪ Seven calibrated tan δ (power factor) values	☑ Allows for a complete range check
▪ Selection of calibrated values and comparison with the measuring bridge readings	☑ Offers a fast functional check for tan δ
▪ Delivered in a carrying case	☑ Convenient for functional check of mobile measuring bridges
▪ Wide temperature and humidity range	☑ Stable and reliable ceaseless operation

Applications

Fast functional check of capacitance and tan δ bridges such as;

- MIDAS 2881
- MIDAS micro 2883 and others

Scope of Supply

- Nominal capacitor in a carrying case with seven calibrated tan δ (power factor) values.
- Test certificate.

Accessories

Lemo-Lemo/Blue/10 Lemo measuring cable (10 m)
